I am looking to develop myself within a company that allows me to acquire knowledge and experience, while giving me the opportunity to contribute my skills, enthusiasm and energy to grow professionally. I currently work predonminantly in frontend development, though I've also been involved in backend development. As a result, I am **open to learning** and performing as a full stack developer. I would like to be able to teach other team members in order to improve my leadership skills. I'am currently studying with the tecnologies : **Angular, Vue, React Native y Flutter.**

Skills

Web developer

- | | | | | |

- Team work
- Continous Learning
- Proactive

Work Experience

Frontend Developer , Nexitus(CR)

August 2022 – July 2023

Projects

Trainme Platform

Maintain and improve the E-learning platform <https://trainme.cloud/>

- The platform improved significantly thanks to all the bugs I fixed in the frontend
- Improving perfomance when making requests to the backend
- I was in charge of dealing with the huge technical debt of the project and despite that I kept on creating new features as the client required
- Using aws S3 service for the storage of images and PDF files

Tools: React Js, Redux , Material UI, Laravel,Redux toolkit, Scrum agile methodology, Styled components, Figma, Javascript, AWS

Development of the new version for the Trainme platform

- Development of user interfaces and connection to the backend using Graphql
- Graphql endpoints development

Tools: React Js, NextJS, NestJS, Scrum agile methodology . Graphql, Chartjs, Tailwind, Figma, Javascript, AWS

Frontend Developer, Bureau Veritas

February 2022 – July 2022

Web application for hardware store

Web application development was carried out to create an ERP system for a hardware store, involving SQL procedures for data storage and consumption from the frontend implementend in React.

Tools: React Js , Material UI, Sql server, Scrum agile methodology, Figma, Javascript

Frontend Developer, Aventura Tech

March 2020 – December 2021

Projects

Inokuos web platform

Development of a web application that involved managing a cleaning company, including the creation of a customer service schedules and managing payments to employess.
